

ELV, WASTE, REMEDIATION, DEMOLITION

About us:

Pomili Demolizioni Speciali Srl has been a leading company in the environmental sector for over 40 years. The company is at the forefront of operational procedures and technologies thanks to the high qualification of its team of operators, consisting of specialized technicians and engineers.

The company is headquartered in Monterotondo (Metropolitan Area of Rome) and in 2023 opened a second office in the Rieti-Cittaducale industrial area.

Pomili Demolizioni Speciali Srl is constantly updated in relation to market requirements and new regulations that are introduced, and is also highly qualified in environmental, organizational and management engineering skills.

The company adopts the Integrated Management System according to international standards UNI EN ISO 9001, ISO 14001, ISO 45001 and SA 8000.

The German Institute for Quality and Finance, European leader in quality surveys and seals of approval, in the special issue of 'La Repubblica Affari & Finanza', ranks Pomili Demolizioni Speciali Srl among the 600 Italian companies (position No. 310) with the greatest economic growth, qualifying it as 'Growth Champion 2022', and subsequently, for the second time in a row, among the 800 Italian companies (position No. 320), identifying it as 'Growth Champion 2023'.

CERTIFICATIONS AND REGISTRATIONS

Pomili Demolizioni Speciali Srl, through the optimization of its procedures and services, holds these certificates of conformity:

- No. CERT-14541-2004-AQ-ROM-SINCERT (Quality);
- No. 279892-2018-AE-ITA-ACCREDIA (Environment);
- No. 279893-2018-AHSO-ITA-ACCREDIA (Safety at Work);
- No. 10000516583-MSC-SAAS-ITA (Ethics and Social Responsibility).

The company is enrolled in the National Register of Environmental Managers (Albo Nazionale Gestori Ambientali) in categories/classes 1D, 4D, 5C, 8F, 9D, 10B-C and is a member of PolieCo - National Consortium for the Recycling of Polyethylene Waste.

Authorised Treatment Facilities (ATFs)

Pomili Demolizioni Speciali Srl, with offices in Monterotondo (Rome) and Cittaducale (Rieti), is a modern industrial car and motorbike recycling plant. A center for the collection and treatment of End-of-Life Vehicles (ELVs), it is a member company of CAR - Confederazione Autodemolitori Riuniti - United Confederation of Car Wreckers; it is also a PRA (DVLA)-authorised platform for dealing with cancellation procedures.

For over 40 years in the automotive field, **Pomili Demolizioni Speciali Srl** complies with all the strict criteria on transfer, dismantling and scrapping of ELVs (including those laid down by the ELV-U.N.R.A.E. Unione Nazionale Rappresentanti Autoveicoli Esteri - National Union Of Foreign Car Representatives) and, since January 2018, has held the AVEI (Autodemolitore Veicoli Elettrici o Ibridi - Electric Hybrid Vehicle Wrecker) qualification for the correct End-of-Life management of electric or hybrid vehicles.

Pomili Demolizioni Speciali Srl is a company with Authorized Treatment Facilities for leading Automotive brands and manufacturers.

ELECTRIC CAR AND HYBRID VEHICLES WRECKER

Since January 2018 **Pomili Demolizioni Speciali Srl** has been a car wrecker with AVEI (Car wrecker of Electric or Hybrid Vehicles) qualification, possessing the necessary skills for the correct end-of-life management of electric or hybrid vehicles. The acquisition of innovative knowledge and expertise on electric and hybrid vehicles in the car wrecking business guarantees specialized services and a competitive partnership with automotive brands.

To achieve this qualification, **Pomili Demolizioni Speciali Srl** has proved, in third-party audits, to meet technical, operational-managerial and training requirements.

The AVEI certificate allows the company to:

- ensure the Automotive Brands on the proper collection, proper treatment and proper reuse of electric and hybrid vehicles, referring to their technical documentation for operations to be carried out also on crashed vehicles, for the information on different components, materials and hazardous substances;
- ensure a comprehensive and professional service to its customers, while keeping abreast of the system and component innovations brought about by the different technologies on the market related to electric or hybrid vehicles.

The technicians **Pomili Demolizioni Speciali Srl** recover and valorize HV components and batteries from hybrid and/or electric vehicles, thanks to the PES/PAV (Expert/War-ned Person) qualification, the PEI (Person Suitable for Live Electrical Work) qualification, the advanced and continuous training on the treatment of HV components and batteries, of electric and/or the hybrid vehicle components and decades of experience in the sector. The AVEI certificate and ISO certifications guarantee compliance with environmental regulations, CEI 11-27, the obligations laid down in Legislative Decree 81/08 regarding the health and safety of workers, and the best practices defined by major Automotive manufacturers.

GEA CARONTE24 PROJECT

The GEA (Environmental Services and Self-Demolition) project, presented by Pomili Demolizioni Speciali Srl for the Public Notice "Digital Impresa Lazio", in partnership with innovation experts from Giunko Srl – successfully created the online service "CARonte24". A project co-financed by the European Union thanks to the contribution of the Lazio Region under the POR FESR 2014-2020.

Through the "CARonte24" web portal it is possible to manage independently:

- vehicle recall requests;
- check your bookings;
- download the scrapping documents.

CARonte24.com

SCRAP YOUR VEHICLE FROM HOME IN 2 CLICKS

Book a home pick-up of your vehicle!
24 hours a day, 7 days a week!

Caronte24.com is a tool available to individuals, businesses and public institutions.

Dealership - Caronte24.com has been created to support professionals in order to simplify the management of pick-ups, documents and delivery status in a single platform. It is possible to plan the collection of vehicles at one's own location or at that of customers, devoting more effort to business matters.

Car wrecker - Caronte24.com aims to establish a network of Authorised Treatment Facilities throughout the country, so as to guarantee traceability and security of operations, thanks also to a wide-

spread growth of know-how according to the drivers of innovation and environmental awareness.

Public institution - Caronte24.com wants to be a simple and functional support tool for all administrations and public bodies. Together to take all abandoned vehicles off the road, to manage and organize the removal or scrapping of end-of-life vehicles in the territory.

ROMA
CAPITALE

C.A.R. PROJECT (CONTRO LE AUTO RIFIUTO - AGAINST WASTE CARS)

On 23th of October 2018 **Pomili Demolizioni Speciali Srl** began the service of removing abandoned vehicles from the streets of Rome. Coordinated and assisted by the Local Police, the company removed from public streets

5,088 vehicles

(cars/trucks/vans/motorcycles/bikes/velocipedes)

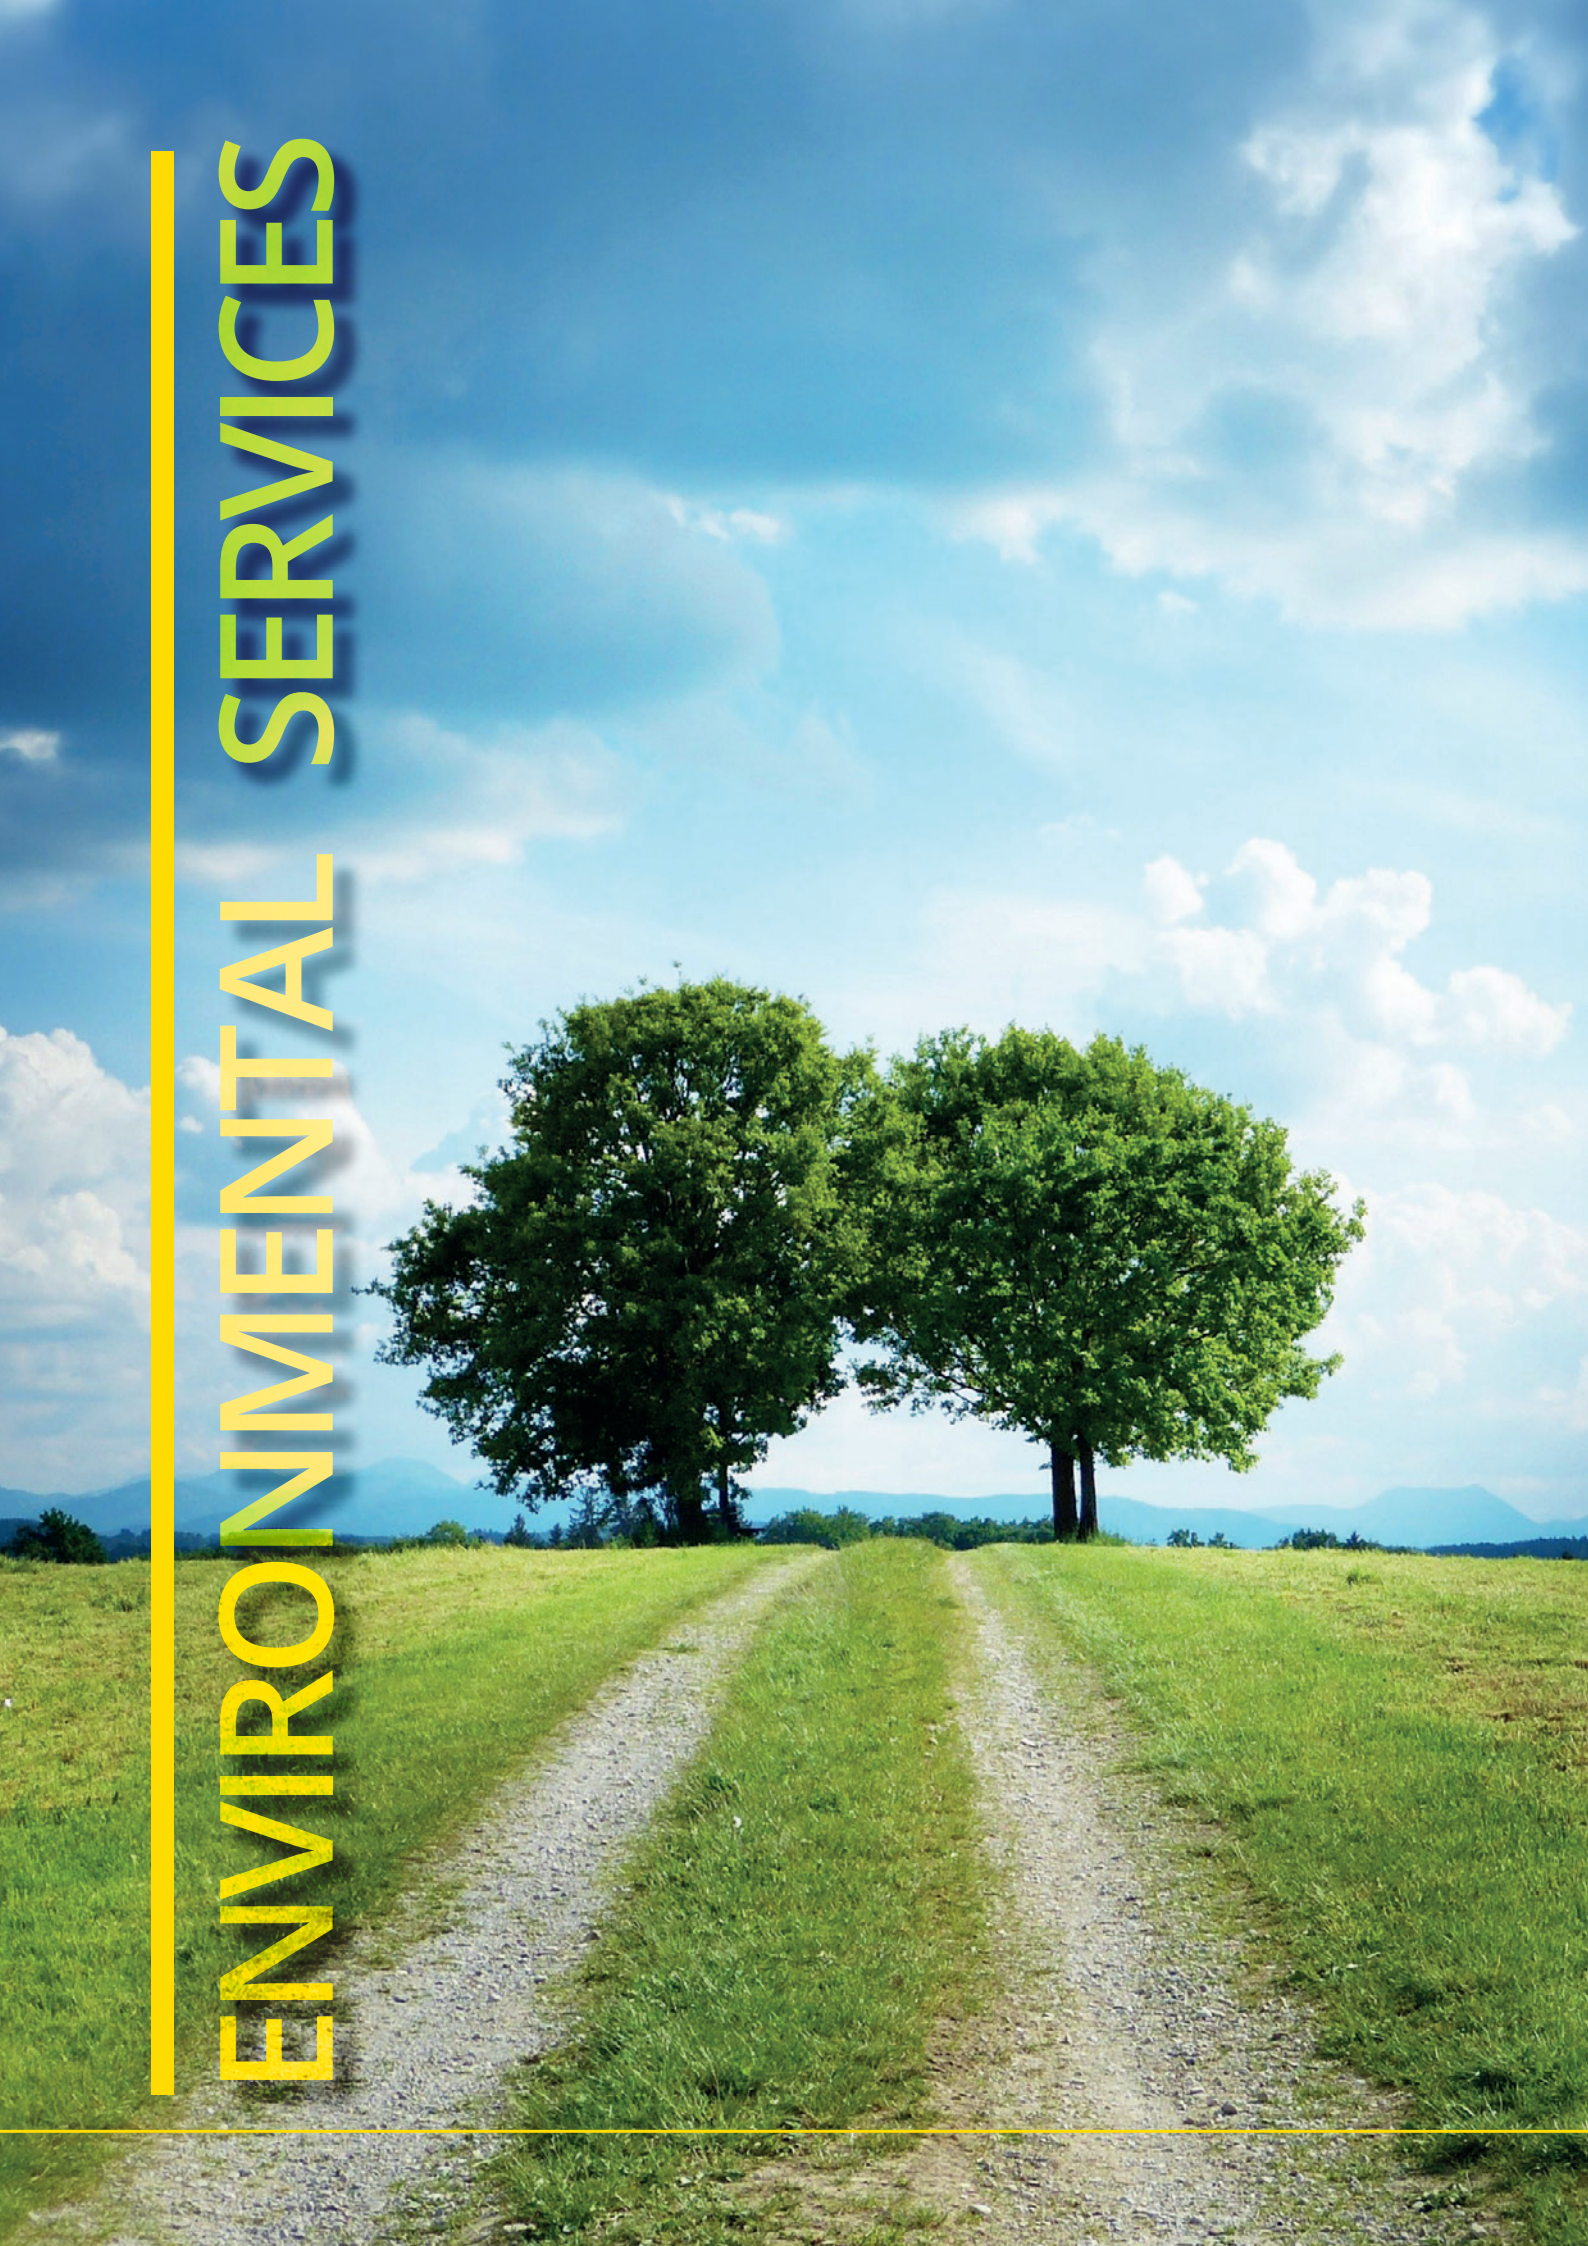

YEARS 2018-2022

On the basis of this experience and thanks to the digitization of the processes enabled by the Caronte24.com platform, an initiative was developed to support local public administrations for the protection of their territories with regard to waste vehicles in public areas. In 2022, the first public authority agreement was signed.

This is our contribution to making the Italian capital and our territories more beautiful and livable: a quick and professional service to rid the city of burnt car wrecks, vandalized vehicles and various wrecks, defacing places ranging from the historic center of Rome to the Sabina area and Ostia's beaches.

WASTE MANAGEMENT

COLLECTION, TRANSPORT AND BROKERAGE

Pomili Demolizioni Speciali Srl is a leading company in the waste management sector, both of urban and industrial origin. The company, with an extensive fleet of vehicles of different capacities, is authorized by virtue of its registration in the National Register of Environmental Managers (Albo Nazionale Gestori Ambientali) in categories/classes 1D, 4D and 5C for the collection, collection and transport of:

- non-hazardous municipal waste;
- hazardous municipal waste;
- special non-hazardous waste;
- special hazardous waste.

The services described above are carried out with great professionalism and care, while guaranteeing scheduled, timed, accurate and regulatory-compliant interventions:

- Safety (Legislative Decree No. 81/2008 as amended);
- Environmental (Legislative Decree no. 152/2006 and subsequent amendments and integrations);
- Highway Code (Legislative Decree no. 285/1992 and subsequent amendments and integrations).

Total Waste Treated
YEARS 2019-2022

The company is a benchmark for individuals, companies, businesses and organizations that have to manage their waste and have to fulfill the various obligations (keeping and filling in the loading and unloading register, drawing up and submitting the waste management report).

M.U.D. - Modello Unico di Dichiarazione Ambientale (Single Environmental Declaration Model), supply, drafting and compiling of the Waste Identification Form).

Pomili Demolizioni Speciali Srl, service center and branch office of Li.C.S.A.- Ecologia, is authorized to keep loading and unloading registers for special waste producers whose annual production does not exceed 20 tonnes of non-hazardous waste and 4 tonnes of hazardous waste. The latter can therefore also fulfill the obligation to keep waste loading and unloading registers through the relevant business associations or service companies directly subordinated to them.

Pomili Demolizioni Speciali Srl can:

- enter into clear, simple and transparent agreements with all customers;
- provide tailor-made services for each type of customer need and request (pick-up schedule, times, days, etc.);
- carry out, through authorized and certified laboratories, sampling services and chemical-physical analysis on waste;
- provide assistance and direct environmental consulting for any problem on waste management;
- rent and deliver to its customers approved: containers/containers/tankers/dumpsters/compactors of different sizes and capacities for storing waste prior to collection.

In addition, the company carries out waste intermediation activities (registration in the National Register of Environmental Managers - Category 8), having established excellent relations and partnerships with waste storage/recovery/disposal facilities over time.

BULKY URBAN WASTE COLLECTION

What is bulky waste

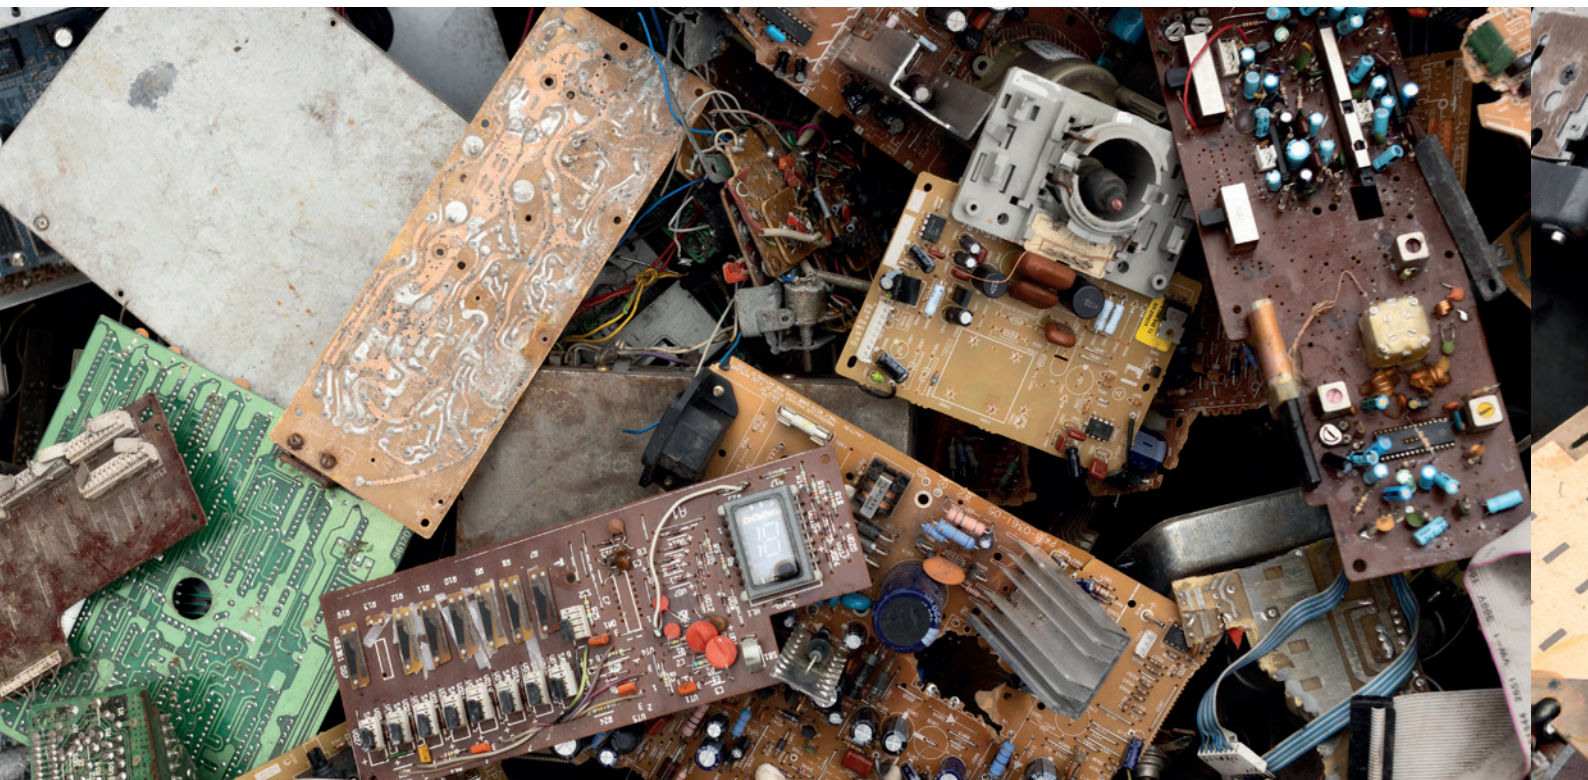

Bulky waste is defined as large municipal waste that cannot be transported by car, consisting of everyday household and/or furniture items (refrigerators, furniture, tables, mattresses, etc.) as well as durable goods such as WEEE (Waste Electrical and Electronic Equipment), which by type or size cannot be collected separately door to door.

Whom we address:

- door-to-door collection management for municipalities and public bodies;
- support to companies contracting urban hygiene services;
- the service is reserved for households;
- those who do not have a vehicle for transporting bulky waste to the ecological islands.

The following activities are planned as part of this service:

- collection of bulky items from the street level following their placement by the user near his or her house number;
- transport and delivery of the above-mentioned material to the relevant Municipal Collection Center;
- transport and delivery of the above-mentioned material to authorized recovery/disposal facilities or Re-use Preparation Centers.

SCRAPPING, TREATMENT AND STORAGE OF ELECTRICAL AND ELECTRONIC EQUIPMENT (WEEE) AND FERROUS AND NON-FERROUS MATERIALS

New operational site for **Pomili Demolizioni Speciali Srl** in the waste management sector located at Via Benito Graziani, 3 in the municipality of Cittaducale (RI), in the zone of Santa Rufina, to be more precise in the industrial area.

The company is authorized to treat and store the following waste:

- scrapping of end-of-life equipment (WEEE) containing hazardous substances and their components, as listed in Annex II of Legislative Decree No. 49 of 14 March 2014, with storage (R13) and reuse only;
- scrapping for recovery, recycling, reuse of end-of-life equipment (WEEE) and their components, as listed in Annex II to the same Legislative Decree 49/2014, not containing hazardous substances;
- scrapping for recovery, recycling, reuse of non-hazardous waste (scrap metal), in the types set out in Ministerial Decree of the 5th February 1998.

ASBESTOS REMEDIATION and CONTAMINATED SITES

Pomili Demolizioni Speciali Srl, regularly enrolled in the National Register of Environmental Managers in categories/classes 9D and 10B-C, operates throughout the country and is the optimal technical-organizational and operational support to deal with problems, both in the civil and industrial fields, of:

- remediation of contaminated, decommissioned and non-contaminated sites and assets;
- removal, remediation and encapsulation, with specific products for removal and disposal, of manufactured articles containing asbestos in a compact or friable matrix;
- confinement, coating and overcoating of asbestos-containing artifacts of compact or friable matrix;
- conservative encapsulation of asbestos-containing manufactures of compact or friable matrix;
- reclamation of sites, assets and land containing asbestos;
- risk assessment and evaluation of the state of preservation of asbestos-cement roofs in accordance with the General Health Directorate Decree no. 13237 of 18/11/2008 with the definition and specific certification of the Degradation Index (D.I.).

Only as examples, the artifacts in which it is possible to find the presence of asbestos are:

- | | | |
|----------------------|------------------|-------------------|
| • covers; | • pipelines; | • reservoirs; |
| • chimneys; | • flooring; | • insulation; |
| • glues; | • infill panels; | • various plates; |
| • rainwater pipes; | • tanks; | • containers; |
| • flues; | • sheaths; | • gaskets; |
| • insulating panels; | • plasters; | • etc. |

For many years, the company has also been a point of reference for public administration (municipalities, provinces, regions, various bodies), major national and international private companies, building administrators and private individuals.

* Asbestos (kg).

IN RECENT YEARS WE HAVE REMOVED THE EQUIVALENT OF ABOUT 7 TRUCKLOADS OF AUTOASBESTOS

174,481 kg

REMOVED ARTEFACTS CONTAINING ASBESTOS
YEARS 2019-2022

The company's technicians, with specific skills and experience in the sector, ensure:

- maximum transparency in relations with the competent bodies (ASL - Local Health Authority), police forces, etc.);
- handling all the paperwork related to reclamation operations required by law (drafting and presentation of the Work Plan to be submitted to the competent ASL, work commencement communication, work completion communication, work completion report, documentation certifying reclamation, F.I.R. to certify that the work has been sent for disposal, various communications, etc.);
- the provision of all kinds of information, suggestions and collaboration, to draw up studies and operating specifications and quality, risk analysis and safety procedures.

The company also handles the management of waste that is generated and produced in the various operations, ensuring the traceability and control of all stages:

- classification;
- characterization;
- sampling of material containing asbestos;
- sampling and monitoring of airborne fibers;
- qualitative/quantitative/mineralometric analysis carried out by approved laboratories;
- document management;
- packaging;
- transport and logistics;
- recovery and/or disposal in authorized facilities.

DEMOLITION OF BUILDINGS AND INSTALLATIONS

Pomili Demolizioni Speciali Srl has the highest qualifications in the field of engineering, organizational and management skills in the demolition and dismantling of disused and non-disused buildings and plants of the following type:

- industrial;
- civil;
- commercial;
- road;
- naval;
- military;
- railway;
- aeronautics.

The company, which operates throughout Italy, is able to perform various demolition techniques depending on the circus environment and the type of commission, in particular:

- hot interventions;
- cold interventions;
- torch operations;
- interventions with hydraulic semi-twenty shears, grapples, telescopic cranes, spider loaders and other specialized demolition equipment;
- selective and controlled interventions;
- interventions with disc cutting and dismantled wire;
- elevation and high-rise interventions;
- manual interventions.

Our engineers, with multidisciplinary skills, are available to provide advice and all kinds of information, collaborate, draw up operating specifications, offer quality procedures and risk and safety analysis.

In addition, the company handles the management of the waste generated and produced in the various operations, ensuring the traceability and control of all phases of classification, characterization, analysis, document management, transport, logistics, and start-up for recovery and/or disposal in authorized plants. Our company's organizational efficiency is synonymous with reliability and certainty in the pursuit of pre-established goals, while guaranteeing rapid, quality intervention and in complete safety. The company also has advanced technology and specialized, continuously trained technical personnel capable of being operational on all sites within a short time frame. All the necessary prevention and protection measures for workers and the environment are guaranteed at every stage of demolition, and all environmental restoration and reconversion operations are completed.

The company performs:

- complete decommissioning, clearing and redevelopment of entire industrial areas;
- demolition of silos, tanks, chimneys, etc;
- selective disassembly, removal and emptying of interiors (furniture, furnishings, fixtures, upholstery, flooring, structures, partitions, false ceilings, masonry, screeds, external and internal curtain walls, door and window frames, exposed fixtures, sanitary fixtures, various materials, etc.) with the recovery and valorization of useful materials and the disposal of compromised materials;
- industrial removals with storage service for short and long periods;
- clearing and emptying of restaurants, farmhouses and commercial premises;
- recovery, dismantling, valorization and marketing of obsolete and non-obsolete industrial plant, equipment and machinery from divestment and/or bankruptcies;
- redecoration and restoration of commercial and residential premises.
